

EYE OF THE BEHOLDER II

LEVEL MAPS

© 2005 Simon Osborne

The maps contained in this document were compiled from a variety of online sources, though mostly my own maps drawn while re-playing the game in February 2005.

My aim in creating these maps was to display all the relevant information for each level in an easy to understand guide for quick and easy reference. The solution maps I found online were not particularly user-friendly, so I decided to compile my own. While my maps are not as exhaustive regarding items and encounters as other resources, they contain all necessary information, such as where exits/portals/pits lead to, and what keys are required for which locks. This information is displayed in a readily usable and consistent manner throughout all the maps contained herein.

The maps are, to the best of my knowledge, complete and without error. If you think any of the information is wrong, please contact me at [ravensblade \(at\) ntlworld \(dot\) com](mailto:ravensblade@ntlworld.com) with any queries or corrections.
